has revolutionised the spraying industry for...
space saving... and painting difficult to handle items.

MASTERFLO - UK

SPRAYBOOTHS

Built for every market sector...

Transport

Engineering & Fabrication

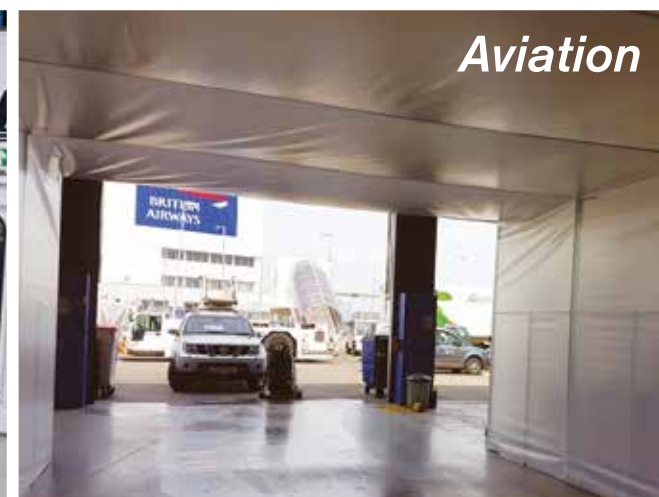

Exhibition & Film

Marine

Automotive

Aviation

MASTERFLO has the complete range of spray booths and many years of experience in the industrial paint field, globally. Our *innovation* and *commitment* to provide *solutions* has been the platform we have built on, to become the *world leaders in Retractable Spray Booths*.

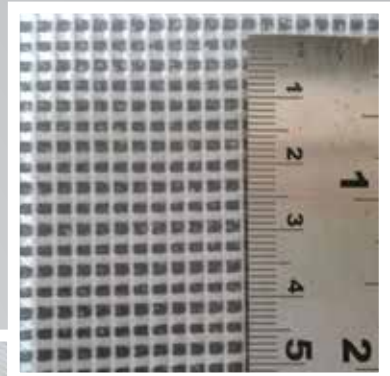

Spraying paint in a controlled environment is essential and has to be performed to comply with current Health & Safety legislation. It is important to ensure that the area where the **MASTRE-FLEX** booth will be installed is in accordance with HSG178, point 40. Hazardous Zone 2 will extend a minimum of 2mtrs to each side and the front of the extended work area.

The design and construction of our **RE-FLEX** frames are a strong powder coated or galvanised steel, built to last and fold back to 16% of the usable size.

- **Tough PVC sheeting is used on the modules. Flame Retardant, Reinforced & Heavy Duty**
- **The Seal-n-Peel, clear flexible sealer that protects your booth from overspray and dirt.**

INSTALLATION

From initial site survey, design, installation and commissioning Masterflo will manage the project right through, providing peace of mind and an outstanding buying experience. Our approved installers cover the UK. LEV certification and documentation supplied.

MASTRE-FLEX Retractable Spray Booths, Bespoke Built...
Designed to provide the customer with a solution that can't be matched...
